Automatic batch close in 3 days

Disable digital signature
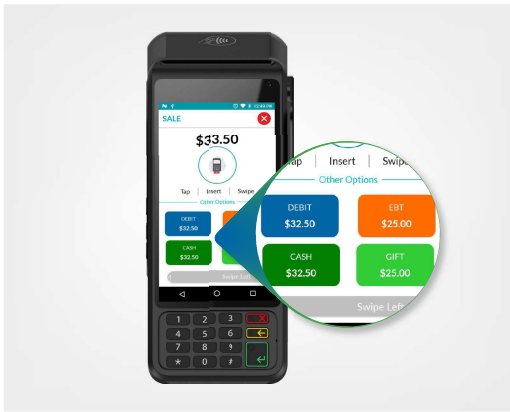

Remove tipline on paper

Login as your merchant

Tip option in payment links

Countertop android POS P1

Tender-based pricing

One step closer to compliance on cash discounting.
Increase your profit by setting fee based
on the tender type.

Digital ads

Advertise for your next sale!
Upon clicking/scanning, take your customers to your
website/promotional page.
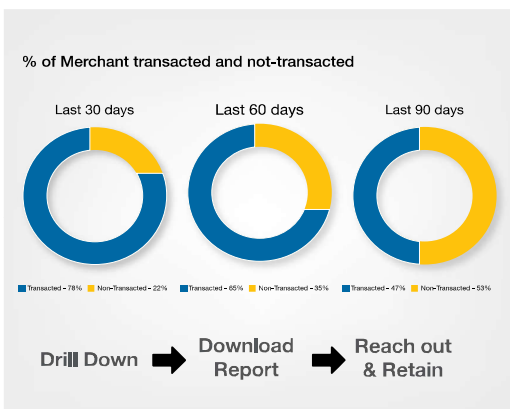

QR on pre-sale ticket

**Improve waiter efficiency by printing a QR code on
pre-sale tickets and benefit from:**
• Seamless tipping
• No more tip adjust
• Reduction in trips from table to the cash counter

Hosted payment page

Integrate with your E-commerce Portal/
Cash Register/CRM/Billing Software and accept all
payment methods remotely.

% of merchants transacted

Real-time view of your non-transacting merchants
Identify and reach your idle merchants and take
proactive measures to increase retention.

% of merchants in the system

Merchant's aging report
Track your growth in recent months and find out if you
are losing merchants.

Dual pricing on virtual terminal

Now add/remove fee for every transaction
Available on all CloudPOS transactions.

iPOSgo!

Our tap-on-phone is now renamed as "iPOSgo!"
iPOSgo! can now do a lot more than before! It can accept contactless and non-contactless cards, QR payments and alternative payment methods without any dongle.

## Tip adjust even after batch out

Merchants can make tip adjustments even after the batch is settled.
Go to the batch, click on the transaction and select additional auth to adjust tip.

Semi-integration solution troubleshooter

If a connection issue arises, SPIn proxy enables merchants to find out if it interrupts the connection with the cash register or terminal.
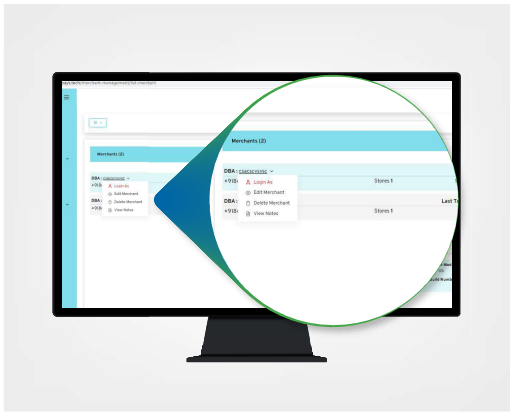

Merchant onboarding API

Easing your workload is our priority!
No need to login to iPOSPays every time, just onboard merchants from your own portal.
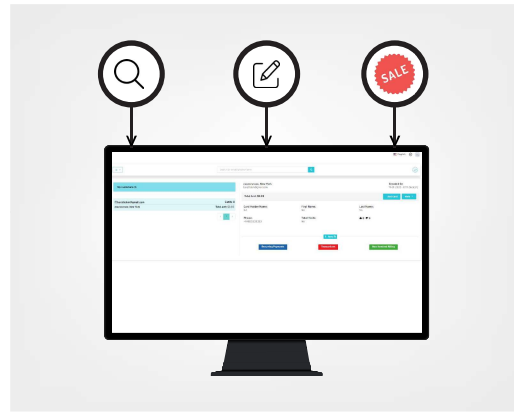

Itemized billing + Level 2/Level 3

Merchants can create a product inventory, send itemized billing and utilize Level 2/Level 3 payment options to cut interchange costs by 40% or more.
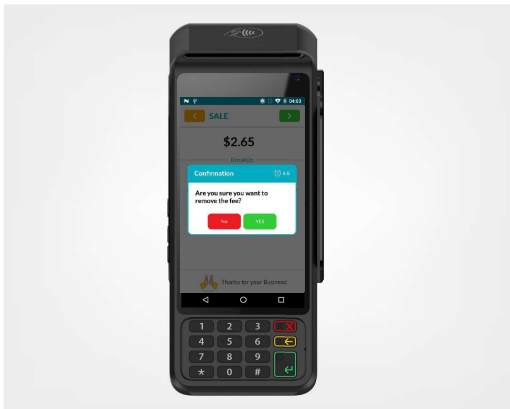

Login as your merchant

Proxy Login
Now you can login as your merchant and troubleshoot their problems.

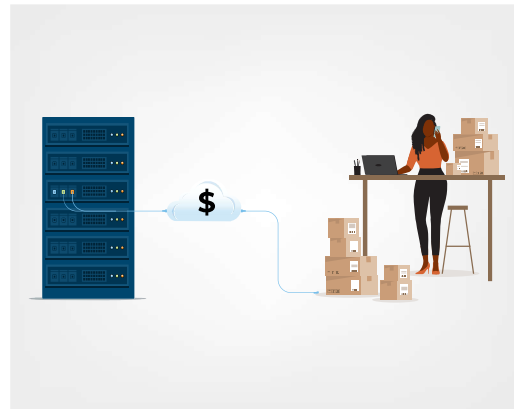

New and improved "My Customer" module

Merchants can:
1.Search any customer by using the search bar ;
2.Edit customer data for any customer; and
3.Perform sales from the module for any saved customer.

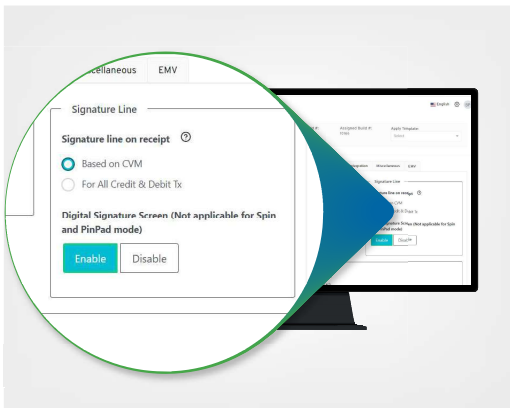

Remove tax with a long press

Merchants can remove tax for a particular transaction, by long pressing anywhere on the tax line POS during the transaction.

Automatic batch close in 3 days

Forgetting to close the batch isn't a problem!
If merchants forget to close a batch, it will be settled automatically in 3 days.

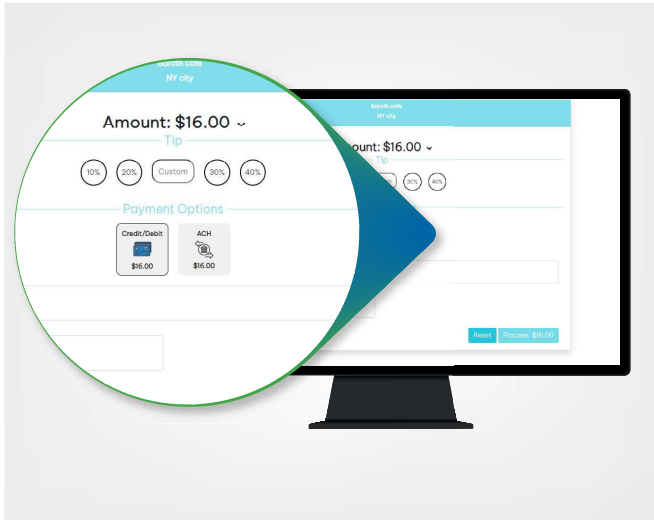

Disable digital signature

Remove digital signature if a merchant doesn't want to get the customer's signature after a transaction.

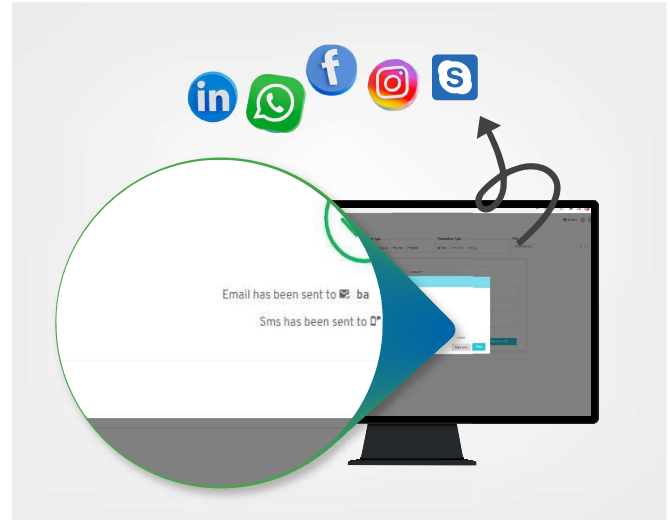

Remove tipline on paper

If a merchant doesn't wish to include the tipline in the receipt, they can remove it.

Tip option in payment links

Merchants can send payment links with a tipping column, for consumers to tip while making the transaction.

Paste payment link on any medium

Merchants can send payment links on any social media or messaging platform and increase their collection rate.

Countertop Android POS (P1)

Most affordable Android countertop on the market. Powered by the iPOSPays gateway.
Large Touch Screen (5" IPS Display), Cash Discounting option, Wi-Fi, Ethernet, USB Port, E-Receipt, Auto Batch Out, and more.
